# Footsie recovers ground after two-day slide

MARKET REPORT By Peter John

Leading UK equities traded brightly yesterday with dealers adjusting to a two-day slide that had seen the blue-chip index fall about 200 points from its intraday peak.

Footsie opened 12 points up on the previous day's close and maintained a firm trend. Then. support in the afternoon from a strong start by the Dow Jones Industrial Average, gave another 41 up at 4.846.7, just below its high of the day.

less fortunate. The FTSE 250 was rates might need to rise less than US Federal Reserve, last com. Capel, said: "We have institumarginally weaker, ending 2.3 lower at 4,461.8, and the Small-Cap was only up 0.5 at 2189.0.

the volume traded in Footsie moving up towards levels not stocks.

It was helped by massive putthroughs in GrandMet and Guinness as Mr Bernard Arnault, the ings in the two companies in what was seen as an attempt to destabilise their merger plans.

Market nerves were steadied night's close on Wall Street, as well as an International Mone-The second-line indices were tary Fund report which said UK

the economy overheating.

Turnover by 6pm had reached bond traders largely ignored the 879.3m shares with 56 per cent of impact of sterling, which was seen on the exchange rate index since the Gulf war seven years after the UK market closed,

Footsie rose smartly to record a chairman of LVMH, shifted hold- 30-point improvement during the morning as institutional investors and marketmakers began to discount the impact of any negative repercussions from last lift which saw the UK index close from the outset by Monday night's Humphrey Hawkins testimony in the US.

when issued stock after its building materials group, over-subscribed placing, giv- eased to 47-ip after Teather ing the mining company a market capitalisation of about £4.6bm

The stock is expected to enter the FTSE 100 after the quarterly meeting of the index committee, due in September. ICI was up 4% to 921%p

ahead of interim results tomorrow with US interest said to be a feature. Sutherlands has told its clients that US buyers hold about 16 per cent of the stock, and their support "reflects the biggest fall in the FTSE enthusiasm over the corporate overhaul, and should underpin the price for now". However, the broker warns that the rating is "looking toppy on even the most optimistic valuation".

The broker has also suggested clients buy BTP. which firmed to 285p.

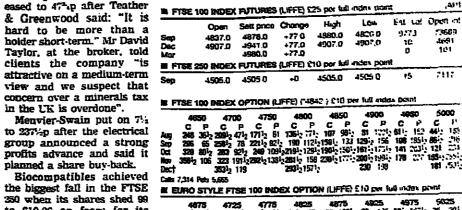

UK food distributor Booker advanced 17's, or 7 per cent, to 264 ap after UBS one of its house brokers, reiterated its positive stance on the stock. The shares have been

weak recently, having fallen from a 12-month high of 4171 to a low of 27050 after exceptional charges dragged 1996 profits lower. A statement in the last

hour of trading from Save Group helped the shares reverse an earlier decline. They eventually closed I's up at 59¹₌p. The company said it had

noted the recent fall in the market price of Save's shares for which it knew of no reason. There was a two-way pull

in retailer WH Smith, which left the shares marginally firmer at 3651/20. However, NatWest Securities does not rate the shares and has urged investors to reduce holdings. "We believe

# Dow rides up on rally for bonds

The US stock market shrugged off its concerns in the hours prior to Federal Greenspan's testimony shares had plunged nearly 10 before Congress, as all major indices rose strongly, urites John Labate in New York. By mid-afternoon the Dow Jones Industrial Average had gained 62.95 at 7,989.67. The broader Standard & Poor's 500 index also moved higher, adding 8.66 at 921.60. The bond market seemed

Share price and Index rebased

little concerned that Mr Greenspan would signal a Fed policy shift in his presentation. By lunchtime the long bond price was # higher at 101%, sending the yield down to 6.505 per cent. ings. Placer Dome advanced

There is a bit of wariness. 50 cents to C\$23.00. but the market is saving it isn't that worried," said Mr Warren Epstein, director of trading at Richard Rosenblatt & Company in New

valuable lesson in market stronger financial perforhandicapping last time and he'll likely refrain from discussing the stock market," katchewan tumbled C\$4.95 said Mr Joseph Battipaglia, or 4.5 per cent to C\$103.05 chief investment strategist after the German governat Gruntal & Company.

composite rebounded, rising 11.25 to 1,547.48. Leading the way higher was software leader Microsoft, which rose \$3 at \$138#. Since reporting Reserve chairman Alan earnings last week, its

> per cent. Other industry gainers included Dell Computer,

In the Dow, tobacco company Philip-Morris surged \$1 at \$42% on a solid earnings report and expectations that President Clinton's task force would endorse the industry's recent agreement. Boeing leapt \$1% at \$55% on speculation that a US-EU agreement was near concerning its planned merger with McDonell Douglas. TORONTO moved higher,

boosted by Wall Street's early gains and a better showing for gold shares. At the noon calculation, the 300 composite index was 32.71 d at 6,680.10. Banks made good progress

with Royal Bank of Canada adding 50 cents at C\$67.70 and Bank of Montreal gaining 20 cents to C\$56.45. Canadian Imperial Bank of Commerce rose 50 cents to C\$38.40 on news of the \$525m acquisition of a US broker. Among gold leaders, Barrick improved 75 cents to

#### FINANCIAL TIMES SURVEY

# Kazakhstan

Six years after the collapse of the Soviet Union, the Central Asian state has made bold steps to jump-start a free market economy, but a rapid privatisation programme has met with criticism, reports Charles Clover and Robert Corzine

# Guarded optimism over oil revenues

he 20th century has many Kazakhs herded into has spent the past decade not been kind to Kazclosed cities" devoted to easing his country out of the akhstan, the vast Cenmilitary production. Their Russian political orbit, the akhstan, the vast Central Asian state whose steppes and deserts could links ran through Moscow swallow the whole of western Europe.

0

In the 1980s, Stalin stripped its nomadic native people of their mobility and tied them to an alien world of bleak collective farms, where perhaps a million people, a third of the Kazakh population, perished. The 1940s saw Kazakh-

stan's killing fields transformed into dumping grounds for the untrustworthy and disloyal populations of the besieged Soviet empire. Cattle cars disgorged millions of Koreans, Tartars, Kurds, Volga Germans, Georgians and Chechens, the descendants of whom make up some of the 120 distinct ethnic groups living in the country today.

The 1950s and 1960s saw huge sections of the country become testing sites for the Soviet military. Until 1989, hundreds of atmospheric and undergound nuclear explosions rocked the eastern region of Semipalatinsk. while a variety of virulent biological weapons were unleashed on islands in the Aral Sea.

At the same time, Soviet economic and agricultural planners sought to tame rivers and toy with nature in a way which has left hundreds of thousands of Kazakhs living in some of the "most polluted parts of the planet, according to the United

economic and administrative rather than to their fellow countrymen living in less sensitive sites. At the same time, an influx of Russians dramatically tilted the eth-

nic balance of the country. Throughout the post-war era Kazakhstan's economy was placed at the service of the Soviet military-industrial complex; the country became a natural resources and raw materials reposi-tory, supplying uranium, put could increase four-fold and raw materials reposimetals and grain to factories in Russia and Ukraine:

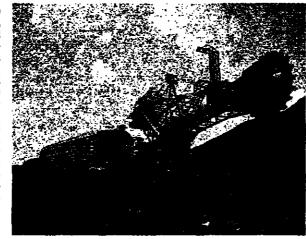

It is not surprising, therefore, that six years after the collapse of the Soviet Union. Kazakhstan is looking forward to a new century with

Page 7

There are also doubts as to whether Kazakhstan will really adopt modern ways of doing business. It is clear from a stroll down any Almaty street that the symbols of western consumerism have been embraced with a passion. Mercedes and Lexus luxury cars vie for space with old Russian Volcas and Ladas. And even small town markets are stacked with western cosmetics and other consumer goods.

But corruption is rampant at all levels of the economy, and many investors remain sceptical that fundamental changes will occur: "They opened the door and invited investors in," said one foreign businessman who runs a large industrial company. "But their attitude towards doing business has not changed very much."

But in spite of such concerns there is still an air of guarded optimism that the Kazakh economy will make it to the oil revenue, although it may be a close run thing: "They'll probably get there in spite of the way they're acting," was the verdict of one senior Almaty

Global Kazkommerts is the leading international securities house in Kazakstan and a major financial operator in central Asian markets.

We opened for business in August 1995 – a joint venture between Global Securities Inc. of Turkey and the Kazkommertsbank group of Kazakstan.

From this alliance, Global Kazkommerts provides a vital channel for international investment into the region, helping foreign clients to make the most of outstanding investment opportunities.

We do this by providing a unique blend of qualities: international financial professionalism combined with an intimate knowledge of the workings of Kazakstan and the region.

economic growth The National Bank of Kazakhstan is full of keen as did inflation and the academic minds - and that of Mr Uraz Dahandosov, the

bank's chairman, is by all

accounts the keenest. Tall, lanky and bespectacled, he pauses to reflect on the country's six-year odyssey of macro-economic stabilisation. "We were mostly learning by doing." he says. Theory? Theory helps to understand the connection between the aggregates. But so many things were disconnected after this high inflation. We are just coming into a period where sophisticated econometric models are use-

This year, in spite of an unscheduled \$500m expenditure to clear pension fund arrears, the National Bank is so far sticking to the IMF decision not to lend the goveroment more than a nominal amount of deficit

Kazakh officials are expecting inflation to come in at under their target of 17 per cent and even show a percentage point or so of economic growth.

But reaching this stage has not been easy. The 36year-old Mr Dzhandosov had just started working at the National Bank in January 1994 as deputy governor when the government began to put pressure on the bank to solve a crisis of inter-industry payment arrears which had reached dangerous levels. The National Bank was forced to issue a massive credit from February to April, which had the effect of doubling the money supply within a few months. Inflation soared to 1,258 per cent and the value of the tenge fell by 80 per cent.

The practical lesson was very strong," says Mr Dzhandosov. "No one here ever wants to see that happen again .. "When [Mr Akezhanl Kashegeldin became

from the government again." The next three years were ern Europe the average is "the easy part", according to about 25 per cent, while in a western economist in Almaty. As the National Bank gradually phased out credit to the government.

the money supply stabilised, exchange rate. But the psychological scars of hyper-inflation have been the hardest to heal. Kazakhstan emerged from its hyper-inflation with one of the lowest savings rates in the world, and coaxing

people to save and invest again, to build a credible banking and payments system, is the toughest part of being an effective central "You cannot use central bank instruments to change

people's psychology," Mr While Mr Dzhandosov spent the past three years watching the inflation rate fall, he is now starting to turn his attention to a new rate: bank loans as a percentage of gross domestic

The reason for this lack of borrowing is that the Kazakh banking sector has been hit especially hard by a new crisis of insolvency, one aspect of a broader problem of payment arrears that has been building up in the Kazakh economy ever since the last arrears problem was cleared by the National Bank in 1994 with such disastrous effects.

Mr Umirzak Shukeev, the economy minister and the youngest of Kazakhstan's wunderkind economists, was unlucky enough to have to deal with this problem earlier this year, when the arrears hit \$7bn or just under half of Kazakhstan's "This is typical for the for-

mer Soviet Union," says one economist. "But Kazakhstan has it pretty bad." Since February, however. the arrears have stabilised,

# A worrying emphasis on re-centralisation

Changes made to attract investors are seen to be rolling back market reform

The biggest political event so far this year in Kazakh- devolve to Mr Kashegeldin's stan happened in early March, when a set of sweep-ing decrees introduced by Nazarbaev promised to slash the government by 50 per cent, dissolve seven ministries, set up four new presidential commissions, and create a national oil com-

The move looked like the akhstan's prime minister, Mr Akezhan Kashegeldin, whose government was gutted by the move while he was out of the country.

But several months after the March decrees, a senior western diplomat sums up the situation: "nothing has changed." While ministries were indeed dissolved, the former ministers are now heads of departments which occupy the same buildings, enjoying every bit of the power they used to wield. No bureaucrats are out looking for new jobs to occupy them, and the presidential commissions have kept out of decision making, at least thus

Prime minister Kashegeldin, meanwhile, whose political demise seemed assured in March, looks as secure as

But observers still point to the March decrees as a subtle turning point in Kazakhstan's economic philosophy. Until then, Mr Nazarbaev had seemed content to let management of the economy government, along with the newly created private sector.

Since March, there has been a new emphasis placed on re-centralisation of long-term economic decision making, symbolised by the creation of the Strategic Planning Committee and Committee for Strategic Resources, alongside legislation providing for the political death knell for Kazempowerment of the State akhstan's prime minister. Mr Investment Committee to be a "one stop shop" for foreign

> The reason for the subtle shift in philosophy, according to his advisers, is that Mr Nazarbaev has become increasingly focused on Asia, not only as a foreign policy priority, but as a model of development as well. "The paternalistic capitalism model appeals to him," says a senior western diplomat.

"Its true that the idea is to move in the direction of the of these South East Asian countries," said Natlonal bank chairman Mr Uraz Jandosov, "the high rate of economic growth is the best incentive. However, this 'model' differs substantially from country to country." In the end, Mr Nazarbaev

ever in the driver's seat of may have to choose between his cabinet. may have to choose between his fondness for paternal his fondness for paternal Asian-style capitalism and its more liberal western counterpart.

Western economists point to post-March policies which they argue are rolling back market reform, such as centrally directing credit, characteristic of many Asian "tigers". Recently, the government provided a no-interest loan to a coal mine, and last month, issued a decree requiring all domestic banks to hold 10 per cent of their loan portfolios in small and

medium-size enterprises. Such policy questions are likely to raise eyebrows during Kazakhstan's next IMF review in November. "I thought they got rid of this stuff when they left the Soviet Union," says one western economist in

Almaty. And over the past few months, arguments have broken out over the one of the prerogatives of the State Investment Committee, which was to grant tax incentives to foreign investors in certain hard-to-privatise sectors.

"Depending on the amount of investment in a project, we give from 1 to 100 per cent tax holiday," says Mr Akhmetzhan Yesimov, chairman of the State Committee on Investment. in April, the IMF came out

against the policy of granting tax incentives, claiming it would eat into the government's finances, which were

threatened to suspend the country's 3-year Extended Fund Facility granted last year unless the Kazakhs ditched the incentives.

"The IMF was worried that our tax holidays will lower our budget revenues," says Mr Yesimov. "We explained that tax holidays are only given to new production. We will create a new tax base with this law."

The IMF settled for a full accounting by the Kazakh government of all tax incenlives given. According to Mr Yesimov, his committee is now considering over 200

But both Kazakh and foreign experts are not just worried about tax revenues but the lack of transparency that accompanies direct state involvement in individual deals.

"The state should not be involved in individual transactions. It should not be creating multiple tax regimes," says USAID economist Mr Steve Lewarne.

"Political favouritism, if it happens, is a major obstacle and threat," says Mr Jando-sov. "But the IMF was objecting based on negative experiences in other countries. The idea of tax concessions was only part of this 'one stop shop' concept, and if the outcome will be negative it must be reconsid-

· Mr Nazarbaev's firm grasp on Kazakhstan has always

drawn criticism from west- and centralise local adminisern politicians and diplosome businessmen, who up until now have felt more confident knowing that Nazarbaev wields the ultimate power over the reform process. "He's somewhere in between Franco and Chile," enthuses one western busi-

KARACHAGANAK • by Robert Corzine

# Kickstart for troubled field

Gazprom's demands are hindering deals at huge gas and condensate site

Karachaganak, a giant natural gas and condensate field in northern Kazakhstan, has become a byword for the complex political and commercial manaeuvring that has delayed virtually every attempt to put together big energy deals in the Caspian Sea region and central Asia.

In recent weeks, attempts have been made to breathe life into the project, on which BG of Britain and its partner Agip of Italy have lost more than \$70m over the past few years. In early July the two companies and their new US partner Texaco agreed on a revised strategy which could see production of condensate - a naturally occurring gasoline - begin to reach world markets early

The main problem with developing Karachaganak lies in its position in the old Soviet energy infrastructure. Although the field is within Kazakhstan, its location close to the Russian border meant that it was always intended to be integrated with existing gas processing and pipeline facilities oper-

ated at nearby Orenburg by another positive factor. Gazprom, Russia's powerful gas monopoly.

has also been the focus of an dispute within the Kazakh government over who will be responsible for the negotiations with the international consortium on a final production sharing agreement sharing principles agree-

ment signed in 1995. But the attitude of Gazprom has been the main stumbling block, say officials and executives. It has at best been lukewarm about the western-inspired plan to develop the field, which, with reserves of about 1.33 trillion cubic metres of gas. 4.7bn barrels of condensate one of the jewels of Kazakhstan's energy sector. At one stage Gazprom

agreed to take a 15 per cent stake in the consortium in a move which the western the way for them to use the Russian pipeline grid to export gas. They were also heartened by the fact that Orenburg's own gas reserves would soon need a new source of supply to keep the processing plant working at capacity. The fact that Russian prime minister Mr Viktor Chernomyrdin comes from Orenburg was seen as

breathe," said one official. A workable deal with Gaz-

prom remains the best option for Karachaganak's long-term future, say those involved in the project. But Kazakh President Nursultan Nazerbayev has put pressure on the companies to come up is about the exact amount with an interim solution we need to reinject." that would at least allow the first phases of a full development plan to proceed.

It will require the construction of limited processing facilities at Karacha-

But none of these elements seemed to sway Gazprom. Progress on Karachaganak and "to all practical purposes it has now left the project", said one of the consortium members. The western companies

say that although Gazprom agreed to process some of the gas as an interim meato replace the production- sure, it made too many demands for the full project to be economically viable. "If Gazprom had come along and said to BG and Agip, you carry our capital costs, and in return we'll make the project work,' that would probably have been alright," said an Almaty oilman familiar with the negotiations. "But instead they wanted BG and Agip to carry them, and charge 30 per cent for processing."

The struggle with Gazprom has caused even the current, modest output targets for the field to be missed. In 1996 Karachapartners thought might pave ganak produced only 1.9bn cubic metres of natural gas and 1.8m tonnes of conden output - and only a fraction of the 15-16m t/y of condenwere dwindling, and that it sate and 20bn-22bn cubic metres of gas that it could eventually produce.

In addition revenues from the amounts that are now processed at Orenburg and sent into the Russian oil and gas system have proved far below expectations. Under the current formula Kazakhcents on every revenue dollar, but officials say that "at best" it has been receiving the condensate would allow half of that. "The Russians are barely letting us

ganak to lessen the government is willing to see stranglehold of Gazprom. natural gas displace Kazakh- representative in Almaty.

ing "a bankable solution" to transporting the liquid condensate and agreement on what to do with the gas pro-

Both Agip and BG have capacity in the westernfunded Caspian Pipeline Consortium project that will be built over the next few years to link the Tengiz oil field in western Kazakhstan with the Russian Black Sea port of Novorossiysk. Building a direct link to CPC for could boost export volumes. the Karachaganak partners to bypass the Russian pipeline system which has proved so troublesome.

duced at Karachaganak.

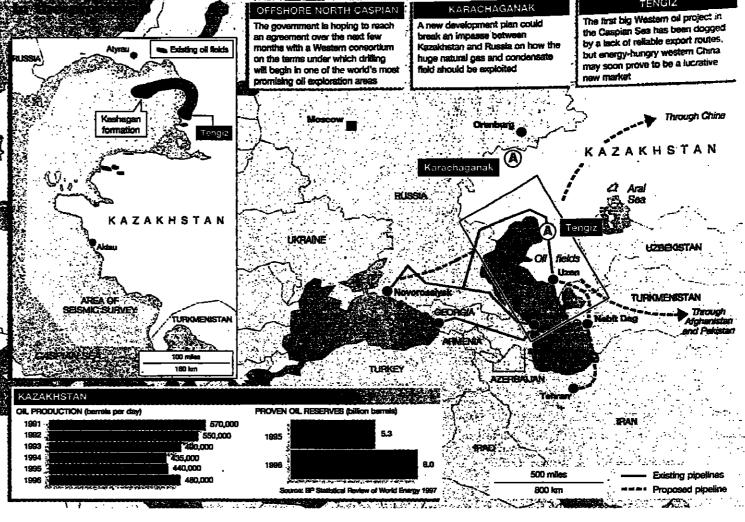

But the gas remains a problem. "The options are that you can either dispose of it in Kazakhstan or Russia or reinject it," said one consortium official. "The debate

The gas could be used for power generation and other industrial uses in northern Kazakhstan, but the amounts needed will depend on the extent to which the

Lukoil, which has assumed Gazprom's place as the Russian member of the Karachaganak consortium, could also prove decisive in making the project work. Western executives say Lukoil. Russia's biggest oil com pany, may be able to help move "liquids over and above" those that can be accommodated in the CPC arrangements within Russia may also be possible that

The western partners also hope Lukoil will prove more adept at influencing Gazprom to reach a long-term accommodation. But how that might be achieved remains unclear, even to those who might normally be expected to know the details of such dealings.

"When the Russian ambassador came up to me at a party and asked me what was going on between Lukoil and Gazprom at Karachaganak, it made me feel better for not knowing myself," said Mr David Skeels, the BG

THE LURE OF THE EAST • by Robert Corzine

## China, a vast potential market for Kazakh oil

Debate under way on the economic viability of an oil export line to the Asia-Pacific

region The lure of the east is growing stronger for Kazakhstan's oil industry, even though China's energy-hungry main industrial centres many thousands of kilometres away from the big oil fields around the Caspian

Over the past few months series of events have brought closer the prospect that Kazakhstan could carve out a potentially lucrative role as an oil supplier to its giant eastern neighbour. But serious economic, political and commercial questions stan's giant Tengiz field. remain as to how quickly stan can, or should, tilt its oil industry to the east.

It was the decison in June by the Kazakh government to award the China National Petroleum Company a 60 per cent stake in the Aktyubinsk oil field for \$325m in cash and a promise to invest a further \$4bn over 20 years that triggered the current wave of interest in China as a potential market for Kaz-

akh oil. Much of the planned investment is to be spent on a proposed pipeline linking the Aktyubinsk field in west-

ern Kazakhstan to China. Many western oil men in Almaty are deeply dubious about the economic viability of a full-scale export link to China's Pacific coast.

"I'm personally sceptical about the eastern route," says one executive involved in the seven company consortium to explore offshore in the Caspian Sea. "If the Chinese found lots of oil in the Tarim Basin (which borders eastern Kazakhstan), then it's just about feasible. Otherwise it's stretching eco-

Not all western oilmen share that view, however. The chief executive of one of the consortium's members thinks it is inevitable that China will eventually turn out to be one of the main markets for Kazakh oil. Not surprisingly, that is

nomic reality."

also the opinion of many fund it ourselves." Kazakh officials, although they too have doubts about the economic viability of a full-scale export line to the

Asia-Pacific region. "A pipeline all the way to the Yellow Sea may not be economically very successful," says Mr Galymzhan Zhakiyanov, chairman of the government's Agency for Strategic Resources Control. A senior government adviser agrees: "It will only work if the Chinese government sub-

sidises their part of it." But as Mr Zhakiyanov points out, "China itself is a market." The question is whether Chinese demand is strong enough to attract significant volumes of Kazakh crude across the vast distances of central Asia. Chevron, the operator of Kazakh-

> wany western oil men are deeply dubious about an eastern oil route

cargo of crude to China via

Mr Phil Meek, the company's senior representative in Kazakhstan, says there were signs that western China. and in particular the refinery at Urumchi, could absorb "substantial volumes" of Tengiz crude. The company is studying a plan to build a storage terminal on the Kazakh border, which could be supplied by shuttle trains from Tengiz. Chinese trains, which operate on a different gauge, could then pick up the crude on the

Kazakh officials are also studying more modest pipeline proposals than a full export line to the Pacific region. But as Mr Kaynulla Kasenov, president of Kaz-akhstan's national oil pipeline company points out, even the more modest proposals will depend on the ability of China to find the funding: "If we had just got Hong Kong, then we would

Export pipelines from Central Asia are not just commercial projects, however. Politics may prove to be the decisive factor.

"Nazerbayev is trying like mad to break the levers of power that Russia has over Kazakhstan," says a western diplomat in Almaty. But the award of the Aktyubinsk field to CNPC and talk that a tender for a second field Uzen, may also be awarded to China, has already aroused strong feelings amone some of Kazakhstan's

western supporters. "This leadership is mindful of its place geo-politically and geographically," says another western diplomat.

"President Nazerbayev has valid security concern. But feeding the tiger may not be the right way to go. Appeasement is not a way to

But Kazakh officials are adamant that a pipeline to China is a higher political priority than a link that would go to Azerbaijan on the western Caspian before proceeding on to Turkey, a route that the US and other western governments with interests in the area seem to

plans to test demand this summer by sending its first that an eastern route opens a new commercial dimension to their oil trade.

Pipelines through Russia or Azerbaijan are just different ways to go to the same market," says Mr Zhakiyanov. "A line to China would go to a completely

清白江

-

They also see an eastern pipeline route producing additional benefits to the domestic economy. The Caspian Pipeline Consortium, which will carry Kazakh crude from Tengiz and other fields to Novorossiysk on Russia's Black Sea coast, will run only a short distance through Kazakhstan. Most of the tariffs will go to

Russia. An eastern route from the Caspian oil fields would pass through the breadth of Kazakhstan. Not only would the country earn more tariffs, say officials, but more jobs would be created and there would be the possibility of building a new refinery, fed

#### THE NORTH CASPIAN SHELF • by Robert Corzine

# Pressure for agreement mounts

Failure to reach a deal could set the project back by a year, say industry executives

The gas fields are close to the Russlan border

Pressure is building for the early conclusion of a production-sharing agreement between the Kazakhstan government and seven foreign oil companies on the terms under which one of the world's most promising - but still unproven - offshore oil provinces will be explored and developed.

Failure to reach an agreement on how to proceed with the initial drilling in the offshore areas of the North Caspian could set the project back by a full year, say oil company executives. They need to begin technical preparations in the next few months to meet a limited 'weather window" next year to begin drilling in the shallow waters of the environmentally sensitive area.

Talks aimed at breaking the deadlock in the negotiations recently resumed in New York, Both sides say they are keen to secure an

early agreement. But those tions explains in part why positions also appear to have the way the negotiations

have been organised. At stake are the first 12 exploration blocks to be awarded in a 100,000 square kilometre offshore area over which the seven companies, now known as the North Caspian project, recently concluded a \$350m seismic survey. It revealed between 50 and 100 possible oil-bearing prospects, just one of times as much oil as Tengiz, Kazakhstan's largest exist-

ing oil field, say officials.
"It's really big," said a government adviser in the area some experts claim could rival the reserves of Kuwait. But the members of the North Caspian project, while admitting the geology is almost perfect for the discovery of big reservoirs, say such claims are unwarranted given that the first well has yet to be drilled.

The mismatch of percep-

tions say the bargaining elusive. The companies say been increased sniping risk associated with the projfields in the area may not be as attractive as the Kazakhs claim. Both sides have put forward differing estimates of the reserve base, recoverable reserves, recovery rates per well and other fundamental information that will affect the overall financial formula governing the

returns to the companies. More than half a dozen which could hold two to 12 factors will affect the for- of sending yet more oil to a mula, including the volume of oil produced and its quality and costs. The government wants 80 per cent of the "divisible income" from describing the potential of the project, with a 20 per cent "return target" for the companies. There are also differences over the pace at which the exploration programme and any resulting out. "They [the companies] want loose controls," says one official, while the government is demanding a

familiar with the negotia- an agreement has proved so of the project is such that seemingly minor slippages the Kazakhs have failed to in the early stages could hardened. And there has understand the exploration result in big delays in later phases, pushing back even between the two sides over ect. They also say that the further the date at which the economics of developing government would begin to see significant revenues from the project. The government is also

concerned over what the companies might do if exploration successes coincide with a dip in world oil prices. Officials fear that under such circumstances the companies might let development plans slip in order to avoid the prospect weak market.

The government's target date for first production is "We don't want to hear 2004. 2010," says one official. It also wants to reach plateau production within 10 years. rather than the 12-14 proposed by the companies

But to meet that target there must be significant progress on a number of fronts, including proving a big enough reserve base to justify a new export pipeline. In order to meet the government's timetable exploration

years will need to discover sufficient reserves to justify the start of preliminary engineering for both the offshore platforms, onshore processing facilities and export pipeline by 2000. Final go ahead for all three would take place in 2001, with the proj-

ect up and running by 2004.

ment is considering whether

Meanwhile, the govern-

to broaden the initial 12block exploration area to cover an additional two blocks which have been reserved for the Kazakh Oil, the new state petroleum company. "Fourteen blocks will probably be developed as a group," said one Almaty businessman familiar with the government's thinking on the issue. That would allow Kazakhstan to bring Russian oil companies probably Lukoil and/or Roshelp ensure that Moscow does not raise any political obstacles to the project. "It's only natural they will get involved," said the businessman, although "the question of where they squeeze into the project" has yet to be

# Confidence has been damaged

Scandals cause companies to become more cautious over investment

Gold mining has never been a neat and tidy business, but the lurid scandals that have hit the industry of late have. made even Kazakstan's tremendous gold resources lose their lustre. An exploration hoax, a hijacked tender and a shareholder fight have

given investors cold feet.

Kazakh officials and gold

miners were innocent in the largest scandal to rock the gold industry - the Bre-X hoax in Indonesia. Along with poor gold prices, the revelation that the Bre-X exploration data had been faked has been a key factor in driving down share prices for gold mining companies. Smaller mining companies, who run most of the exploration and production projects in Kazakstan, have been worst hit.

"Bre-X has made it much more difficult for junior companies to pick up exploration cash in lesser known parts of the world," says Mr Richard Wilkins, commercial director of Oxus Resources, exploration company with several sites in Kazakstan, Uzbekistan and Tajiki-

r Kazakh oil

break-up of the Soviet Union has been generated directly from the Vancouver and Toronto stock exchanges, where Bre-X shares were

But Kazakh officials and Placer Dome, Canada's secvery much to blame for the Vasilkovskoye saga, arguably the largest mining scandal to hit the former Soviet Union.

Placer elbowed out competitors, including Dominion Mining, to take a stake in the giant Vasilkovskoye deposit in 1995, Dominion

dollars exploring and proving reserves at Vasilkovskoye, and thought it had exclusive rights for exploitation. Not only was the project snatched away from Dominion, but the government used its data when the project was put out to tender. Placer then deserted the project on finding that the deposit would be expensive

to develop. Placer is keeping the sore open by sning to retrieve a \$35m refundable deposit that was due for repayment by July 4 last year.

Kazakstan had planned to have a new investor by then to replace and repay Placer, but a highly publicised tender, designed to restore trust in Kazakstan's government, failed to attract substantial bids. In January the government turned down the winning bid from a consortium of Teck Corporation of Canada and First Dynasty, a venture of Canadian mining entrepreneur Mr Robert Friedland.

Mr Norman Keevil, Teck president, says the fall in the gold price caused the government to pull back in the hope of getting better offers when the price improved. None have come in as yet but a leading gold company is said to be interested in the Playing for time, the gov-

FISCAL TRANSPARENCY • by Charles Clover and Robert Corzine

Prospects of more signature bonuses for oil projects mean the issue is unlikely to fade

one of the most important of such an amount of issues Kazakhstan faces as it attempts to cope with the pressures of transition to a capitalist economy and a more open, democratic soci-

While considerably more open and transparent than most of its counterparts in central Asia, many processes remain virtually blocked from view in Kazakhstan, such as government finance.

Last year, Mobil oil corpo-

ration concluded a deal with Kazakhstan for 25 per cent of the Tengiz oil field for which it agreed to pay \$1.1bn over a period of several years. The precise amount that Mobil paid last year was \$500m, according to observers. Keeping track money, equivalent to 3 per cent of Kazakhstan's gross domestic product, should be easy, but in practice it has proved impossible to pinpoint where it has gone.

The money, according to some officials, did not make it into the Kazakh budget. Last year, the capital revenues item in the government budget, which is where privatisation revenues are recorded, totalled \$460m from the sale of 4.000

enterprises. These included a 40 per cent stake in Zbekazkantsvetmet copper plant, the Vasilkovskove gold mine, 15 coal mines, Yuzhneftegas oil company and the Chimkent refinery. These transactions alone should have totalled more than \$350m in up-front signing bonuses, not leaving much room for a spare

When asked where the money might have gone, a Mobil representative said: "Any questions having to do with the Kazakh budget, we just can't comment." Mobil also would not comment on how much of the sum was in fact paid in 1996, nor to whom it was paid.

# China a counter-weight to Russia's influence

Proposed oil pipelines 'go to the heart of the issue of territorial integrity'

evolution Kazakhstan's foreign relations over the past year can be traced through the proposed oil pipeline routes drawn on the regional maps that senior officials seem able to conjure up at a

"Pipelines go to the heart of the issue of territorial integrity and independence." says an adviser to President Nursultan Nazerbaev.

moment's notice.

Russia, still the dominant economic and military force in the area, is not surprisingly the destination and main commercial beneficiary stood up for itself lately." of the first big export pipeline from Kazakhstan, the envoy. "It has said, walt a final agreement on which second, we're going to do was reached earlier this what is in our interests. It's cials are relieved that a deal on the Caspian Pipeline Consortium project has removed a long-festering diplomatic and commercial sore with Russia, the fact that the bulk of the jobs and pipeline tariffs will accrue to Russia remains an irritant.

In recent months the importance of China as a counter-weight to Moscow's influence has become clearer: China's National Petroleum Company clinched a recent oil deal in large part because of its explicit commitment to build an eastern pipeline that may

try's economic dependence on Russia. Officials in Almaty say the political importance of the commitment should not be underestimated, even though the economics of such a project look doubtful.

In summing up the present foreign policy priorities of Mr Nazerbaev, one western diplomat in Almaty said: "He is trying to shake the country away from Russia without being held hostage to the Chinese." Some observers have been

impressed by the recent shift in Kazakhstan's stance towards Russia. They say Mr Nazarbaev's government has taken an altogether tougher line on sensitive issues: "Kazakhstan has really said one senior western year. Although Kazakh offi- very interesting Moscow, for Chechnya, which highyou to tell us your view, but here's what we can agree

> Almaty has even surprised other Caspian Sea countries in its firm opposition to Russia over Moscow's view that there should be some joint development of offshore oil areas in the Caspian. They had assumed that Kazakhstan would eventually fall in line with Moscow's views on the issue given the long border between the two and the big ethnic Russian population in northern Kazakhstan. "But they were very tough with Russia on the Caspian later explained the decision

PRIVATISATION • by Charles Clover

# Moving along the fast track

While the sell-off has provided capital, the long-term effects remain unclear

Kazakhstan is coming to the end of one of the fastest orivatisation programmes in history. In less than three years, the Kazakh government has privatised 70 per cent of its economy, leaving only 400 enterprises of the 6,000 in the plan.

The pressure driving privatisation was partly ideological and partly financial, with a need to inject liquidity into the economy. "Privatisation revenues have consistently made up for the over 1996 and the first part of 1997," says a western economist in Almaty.

Meanwhile, foreign investors often took on the role played by banks in other countries, supplying the banking system would have otherwise provided.

The transition to a private economy has been far from process of privatisation has been criticised as opaque, with sale prices that were too low resulting in the sale of a large chunk of Kazakhcompanies that are virtually

Mr Galymzhan Jakionov, head of the watchdog Committee on Strategic tion. The law on privatisa-Resources, cites the sale of tion, for example, is only

example. "There was a tender. There had to be at least two firms. In reality, this didn't happen, and only one firm participated. From our point of view, this was not a

tender," says Mr Jakionov. Nevertheless, the immediate effects of privatisation on the Kazakh economy are impressive. In many cases, seemingly dead factories are now producing at capacity and paying their wages, pensions and taxes on time.

#### Worldwide steel exports

Observers point to the privatisation of the country's steel mill as an example. While UK-based Ispat was given a good deal on AO Karmet - purchasing it without assuming any of the factory's \$200m liabilities the plant is now producing 3m tonnes a year and export- refinery. ing all over the world.

"Ispat-Karmet is intending to get \$200m credit in western markets without any guarantees from the government. If it gets the credit, it will prove that we took the right step," says Mr Umirzak Shukeev, Kazakhstan's economy minister. Nevertheless. many of would-be investors stan's enterprises to foreign have been disappointed by a privatisation process they see as insider-driven.

One of the main problems is a lack of coherent legislathe Chimkent refinery - the four pages long. "You need a that the process could have in 1995. As a result, Ger-

FOREIGN IMPACT ON THE REGIONS . by Robert Corzine

tender for which was won by process," says Mr Alexander gone more smoothly, "Some many agreed to reform its UK-based Vitol - as an Lesser, a US lawyer who has worked on many Kazakh privatisations. "There is no way that a four-page document can handle every contingency that would arise."

Mr Lesser says, for example, that if a firm wins a tender, the winner must sign a contract with the government within 10 days - yet there is no explanation of what happens if this is not done. "You wind up in this grey period where the results of the tender can be overturned at any time and the deposit, which can be

feited." says Mr Lesser. When Access Industries, a British Virgin Islands-based company, won a tender for two power stations in the Pavlodar region, the regional government instead signed a contract with CCL Oil, a company which did not par-ticipate in the tander. CCL Oil operates the region's oil

millions of dollars, is for-

British Virgin Islandsbased Essex Industries, which won a tender for the Atyrau oil refinery in March, had it revoked in April when it was given to Kazakoil, the state oil company. Asea Brown Boveri, the Swiss-Swedish engineering group, won a tender to manage the country's electric grid in April, but the results were overturned in May.

dangerous to win a tender than to lose," says Mr

"Sometimes it can be more

programme! was not transparent, but we were losing time, we had to decide quickly," says Mr Shukeev. Mr Shukeev defends the

low price of many of the enterprises that were sold. "The goal is not to sell at a high price in privatisation," he says. "The main goal is to find an effective owner of an enterprise." But while privatisation

has provided Kazakh enterprises with working capital and wages, the long-term implications of the strategy are harder justify. For foreign companies, Kazakh assets represented a chance to vertically integrate. But it is unclear how this will affect Kazakhstan in the

Power equipment suppliers

Before the results of their concession for Kazakhstan's high-voltage grid were overturned, representatives of power equipment manufacturer ABB made clear that they wanted to use their partnership with German grid operator Veag to monopolise the building of power stations in Kazakh-

The two companies had previously been accused of anti-competitive practices by General Electric of the US when Veag awarded ABB the contract to build gener-Kazakh authorities admit ating equipment in Germany

people say [the privatisation procurement practices.

"It is normal for equipment manufacturers in the power industry to take equity in projects in order to be the builders," says an investment banker in New York. "But taking over the whole electric grid is a bit extreme.'

with the Ekibastus coal pits, which account for 70 per production. These are the Trans-World Group that controls one-third of Russian aluminium smelting, Access Industries, part of an industrial group that owns the Uralsk aluminium smelter and the Vladimir tractor fac-Energy Systems, the Russian electric utility.

dominates Russian aluminjum, has - in addition to coal - managed to secure bauxite mines, an alumina refinery, ferrochrome plants, iron mines and a power station. "Trans-World is completely integrated, from coal and ore to finished aluminium," says a competitor in the Russian metals industry.

Using a similar strategy, Korea's Samsung has been buying copper mines and smelters, with a view to supplying its electronics industry with raw materials.

These vertical integration strategies may in the long-term have a harmful effect on the country's finances. Collecting taxes from vertically integrated companies has always proved a headache for countries in the past, as integration usually involves transfer pricing in order to disguise profits made in the host country.

"None of these companies is ever going to pay taxes," says a western economist in Almaty. "This all looks great now," says another western analyst "But eventually. Kazakhstan will begin to understand why everyone in the third-world nationalised in the 1970s."

Soviet military

On the upstream side of vertical integration strate gies, three Russia-oriented industrial groups wound up cent of Kazakhstan's coal Japan Chrome, part of the tory in Russia, and United

smelters' purchases of raw Trans-World Group, which materials, provided working capital and handled exports, disappeared at the end of 1991. Suddenly, Bratsk couldn't pay Pavlodar which couldn't pay its own suppliers. Pavlodar's output fell by 60 per cent.
"Basically, everything in the Soviet Union was part

of the military industrial complex," says Mr David Reuben, president of the London-based Trans-World Group, which has been trading Russian aluminum for 20 years.

> "With the collapse of the military complex - and therefore demand - all the plants were looking at elimination of their traditional markets and insolvency. In 1995, the Trans-World Group purchased Pavlodar,

providing finance so the factory could pay for inputs and wages. But while Trans-World had started out as a simple trading company, it by that time controlled one-third of Russian aluminum smelting, including the Bratsk and Savansk aluminum smelters. Paylodar's aluminium began once again to flow to

The new monopoly smelter at Bratsk. Privatisation has, for

many industries like Paylodar, simply cemented the old economic relations which existed under communism, where Kazakhstan's factories and mines supplied Russia with cheap raw materials.

Finance and markets in

the former Soviet Union were only available to industrial groups such as Trans-World, who controlled not only the processing facilities, but the banks which now play the role of the old Soviet buying monopoly. Trans-World's bank is Enrasiabank, one of the most active foreign banks in Kazakhstan because it functions as a treasury for

the Trans-World assets. With large stakes in the Bratsk and Savansk aluminum smelters, critics say Trans-World and other panies like it operating in Kazakhstan are simply the reinvented Soviet military industrial complex in western corporate form. "Our large enterprises

had their own peculiarities," says Kazakh economy minister Mr Umirzak Shukeev. "They were compa

towns with big problems. They were parts of technological chains which ended in Russia and the Ukraine which is why these enterprises were of no particular interest for investors."

Trans-World has faced repeated accusations in Kazakhstan of underpaying for its interests in Kazakh assets "by a factor of about 10", said one western lawyer in Almaty.

"It is absolutely not true," says Mr Reuben. "We paid among the highest prices for our investments following privatisation." Trans-World had acquired the shares of the plants after privatisation and after the plants had been rejected by many potential

The company paid \$20m

for Pavlodar, plus an investment pledge of \$128m, and took on andisclosed debts.

KAZAKHSTAN 7

Last year, Pavlodar produced 1m tons of aluminium, worth \$200/ton on world markets. With revenues of perhaps \$150m-\$200m, profits in 1996 may have exceeded the initial investment in purchasing the plant.

Since 1994, Trans-World bas bought up other Kazakh assets, in addition to Pavlodar, including bauxite mines, a ferrochrome plant, iron ore mines, coal pits and a 2400 megawatt power station. Kazakh officials argue

that the goal of privatisation was more important than revenue "From my point of view, the goal is not to sell at a

high price in privatisation." says Mr Shukeev. "The main goal is to find an effective owner of an enterprise, to make it work, pay wages and taxes and sell output on the world market."

Trans-World appears to pays wages and pensions on time, which makes them unique in an economy burdened by a crisis of payment arrears. Recently, it announced plans to build a \$1bu aluminum smelter in Kazakhstan, built by US engineering company Bechtel, to partially replace Russian processing facilities at Bratsk.

"Our intentions for Pavlodar to increase production and build an aluminum smelter is a bold one. It is probably the first greenfield project of this size in the CIS," says Mr Reuben "rather than acquiring significant assets cheaply, we spent a great deal improving these assets to make them viable."

President Nursultan Nazarbaev applauded the decision, "Kazakhstan must achieve a high degree of processing of its resources and not just export raw materials," he says.

THE AES CORPORATION

75 Plants. 20,957 Megawatts. Active in over 35 countries.

AES, the world's leading global power company, is committed to helping shape Kazakstan's power sector. Our plant located in Ekibastuz - the largest in Kazakstan - houses 25 percent of the installed capacity of the nation, and remains one of its least-cost producers of electrical energy. We are optimistic that the challenges of reform can be met and that AES will be an integral part of the bright future of Kazakstan.

# A legacy of failed experimentation

Problems beset the introduction of privatisation. forcing a rethink on policy

In the 1960s, Kazakhstan reform tends to focus on Union's "Virgin Lands" proteers were deposited in the haemorrhage of Soviet hard currency spent on grain season, and an unexpectedly rapid decline in fertility led to its failure.

The legacy of the experi-ment lives on in Kazakhstan, however, where nearly half of the population are still connected to agriculture, and the support of Kazakhstan's farmers is a crucial political goal.

"Forty-four per cent of our population live in rural areas, and that's why we have to conduct policies of protection, and also develop agricultural products and special programmes with the help of state finance policy," says economy minister Mr Umirzak Shukeev.

Farming in Kazakhstan remains unprofitable, and with debts which they can't possibly repay. Last spring. the government outraged foreign oil companies by requiring them to provide

by not paying taxes on the requisitioned fuel.

self-sustaining and profitable is a goal of the Kazakh government as well as many of the multi-lateral agencies.

But while agricultural became part of the Soviet land reform and privatisation as the cure to the ecogramme. Train loads of star-nomic ills of the sector, the ry-eyed communist volun- main hindrance of this process is that no one particumiddle of the steppe to form larly wants the land because collective farms and halt the it is not profitable. "When my collective farm was privatised, everyone wanted the imports. But frequent animals and the trucks," droughts, a short growing says one farmer, "No one wanted the land."

Rather than making agrimaking it profitable, some experts are now convinced that agriculture must be profitable first, and private second. As with most post-Soviet agriculture, the problems are prices and the structure of production, not

age so they are in a weak bargaining position after harvest," Says Mr Steven Gross, a consultant with the ministry of agriculture, Storing grain for six months costs 12 to 15 per cent, or three times the rate in the UK. "Silos charging these rates are practically empty most of the time," says Mr Gross. "You would expect a price war to fill them."

Mr Gross is trying to start that price war. He heads "Agro-inform," started jointly by the Kazakh ministry of agriculture and the exists in the private sector.

European Union's Tacis pro-gramme which publishes Making agriculture prices at mills and silos.

According to Mr Gross, grain storage prices belie a broader problem. "Across the whole agricultural processing sector, plants are working at a factor of capacity and paying low prices and delaying payments for

While it is too early to tell whether the information programme is succeeding, even perfect information" in the jargon of economic theory increase returns to farmers.

"It's hard to tell if the mill operators and silo owners collude," says Mr Gross. "Every mill would have reported to someone in this building," he adds, referring to the ministry of agriculture. "All of them go to the same conferences, they all know each other. If information fails to

jump-start competition, the farmers' only option may be to "vertically integrate" into processing, just as western farmers use co-operatively owned processing facilities. It would, however, be expensive to initiate.

The agriculture ministry is also hampered by a conflict of interest. "It is the single largest buyer of wheat in Kazakhstan," says Mr Gross. between agricultural produc-

tion and processing is very characteristic of Soviet and post-Soviet agriculture." says a Moscow-based expert 'That relationship still Robert Corzine meets a farming family in Kazakhstan's Alatan mountains

# Independence but no power

Farmers do not regret the demise of communism but they do miss electricity

The horses moved quickly down a steep hillside in Kazakhstan's Alatau untains, their hoof beats muffled by a thick carpet of blue gerandums and flowering wild herbs.

In their wake came Mr

Nurian Asgenov, a 37-year-old former collective farmer and proud owner of the horses, an especially hardy cross between traditional Kazakh ponies and a bread from the River Don region in Ukraine. wonderful," he said, giving a thumbs up sign in response to a question about how he and his extended family of parents, three brothers and their children have fared since the demise

Before we depended on the directors of the collective farm and other bosses," he said. "We had to kill cows and sheep whenever they came. Now I'm the owner of my life. No one orders me about."

The lives of the Nurlan family revolve around the ions. The adults live in the mountains year-round, but in the winter the children are sent to relatives in the valley far below to attend school.

Autumn is the busiest time to sell the sheep, cattle and horses that provide the bulk of the family's income.

Some farmers welcome the new autonomy, but many would prefer a return to a time when everyone had jobs

It is also when they buy most of their staples for the year, such as flour, sugar and rice. "We generally have no money," says Mr Nurian, but when necessary the family sells "milk, meat and potatoes. That's how we

When asked whether any big worries have marred his new life, Mr Nurlan could name only two: the Belgians and the wolves. Tractabel, the Belgian utility company which recently bought Kazakhstan's first privatised regional electricity company, had cut

off supplies to his remote family farmhouse. "The Belgians say we

didn't pay," complained Nurlan. "We want to pay. but we don't know how to pay or where to pay." As for the wolves, Nurian believes wars in other

central Asian states are driving them out of their traditional habitats and into the peaceful Alatau mountains. He and his brothers killed 12 last winter: "Our shenherds cry in winter because the wolves kill the sheep.

minds of two shepherds in a nearby yurt, the felt-covered structure which for centuries has been the standard accommodation for central Asian nomads. But so too were regrets that the safe, easy existence under

communism had ended. The men still belonged to a collective farm located 200 brought their herd to the Alatan mountains to graze for the summer. Sitting on their haunches at the entrance to the yurt they admitted that their lives

Nurlan's; they still had a boss they reported to at the collective farm. And although the two men could understand Mr Nurian's philosophy that "if you work hard your life is good," it did not seem to be a fate they relished. "We haven't heard of any good reforms." they said. "There is nothing stable in our lives." The wife of one of the shepherds was more blunt: "We just want to return to the past when everyone had

jobs and life was easy."
